ABSTRACT

A total of 84 publications which contain information related to education in the People's Republic of China are presented in this annotated bibliography. With few exceptions publication dates range from the 1950's to the present; a small selection of earlier materials printed in the 1920's and 1930's is also included. Listed alphabetically by author or sponsoring institution, citations include author, title, publication date and location, and a brief description of covered topics. Materials range from publication catalogs of Chinese academic institutions to bibliographies about Chinese education and accounts of Chinese history which include coverage of education. (LP)
